Education

- **Graphic Era Hill University** *2022 – 2025*
  Bachelor of Technology in Computer Science and Engineering | CGPA: 7.00/10.00 Bhimtal, India
- **Government Polytechnic Garur, Bageshwar** *2019 – 2022*
  Diploma in Mechanical Engineering | CGPA: 8.00/10.00 Bageshwar, India

Experience

- **Interns Tech** *Aug 2023 – Sep 2023*
  Full Stack Web Development Intern Remote
  - Architected and launched a responsive restaurant website with online ordering, menu management, and customer review features using HTML5, CSS3, JavaScript (ES6+), Bootstrap, PHP, and MySQL
  - Strengthened application security by integrating user authentication and payment processing pipelines; optimized SQL database queries to reduce server response time and improve page load performance
- **Prodigy Infotech** *Aug 2024 – Aug 2024*
  Full Stack Web Development Intern Remote
  - Engineered and delivered a full-stack e-commerce platform with product catalog, shopping cart, and user authentication using React.js, Node.js, Express.js, and MongoDB following Agile development practices
  - Architected RESTful APIs with JWT authentication and role-based access control (RBAC); streamlined user permission management to enforce secure access across the application

Projects

- **AI Content Generator Web App** *Feb 2026*
  React.js, Node.js, Express.js, MongoDB, Anthropic Claude API, Tailwind CSS, JWT
  - Engineered a full-stack web application leveraging Anthropic Claude API to auto-generate blog posts, social media captions, and marketing copy; architected scalable RESTful APIs using Node.js and Express.js
  - Secured the platform with JWT-based authentication; built content history tracking with MongoDB and PDF export functionality; streamlined deployment using CI/CD practices
  - Crafted a responsive UI with dark mode support using React.js and Tailwind CSS; followed component-based architecture and Agile development methodology throughout the project lifecycle
- **Real-Time Chat Application** *July 2025*
  React.js, Node.js, Socket.io, MongoDB, Redux, JWT, REST API
  - Designed and deployed a real-time messaging application supporting group conversations and file sharing using Socket.io for low-latency bidirectional communication and Node.js backend
  - Leveraged Redux for centralized state management across components and integrated JWT-based authentication to enforce role-based access control (RBAC)
  - Spearheaded implementation of push notifications and user presence indicators; maintained structured version control workflow using Git and GitHub
